A CITY FOR PROGRESS

April 20, 2011

To Whomever It May Concern,

Burbach Aquatics, Inc. designed our Municipal Aquatic Center. The BAI team was with us throughout all phases of the project, including strong contractor observation in phase III of the project. Their services included technical evaluation and consultation as well as architectural and engineering. Because of their involvement, community support, feasibility, safety, maintenance, budgets, etc. were all considered enabling us to make a holistic approach to a community need.

For the above reasons, we are glad we chose BAI and recommend you strongly consider them for your aquatic need as well.

Sincerely,
Mark Bolander
Mayor of Newton, IL
